

化学科講演会のお知らせ

講演題目："Rhodium-Catalyzed Addition of
Pronucleophiles to Allenes and
Alkynes"

講師：Professor Bernhard Breit
(University of Freiburg, Germany)

日時：3月24日(火)
15時00分より

場所：南7号館7階セミナー室

Abstract: The development of novel atom economic addition reactions of *O*-, *N*- and *C*-pronucleophiles to allenes and alkynes relying on rhodium catalysis will be reported. Exceptional levels of position-, regio- and enantioselectivities were achieved, and mechanistic studies allowed to reveal important elements of the catalytic cycles involved.
