

## 化学科講演会のお知らせ

講演題目：Redox Chemistry with Elemental Sulfur

講師：Dr. Thanh Binh Nguyen (Institut de Chimie des Substances Naturelles-CNRS, France)

日時：10月4日（金）

午後4時30分より

場所：南7号館7階セミナー室

Lecture summary: In this lecture, some recent advances from our laboratory in redox chemistry of element sulfur will be presented. From this inexpensive substance, many original and useful transformations were developed in which sulfur could act as oxidant, reductant or catalyst to provide a wide range of sulfur-containing (or not) linear and heterocyclic compounds.
